**\*\*\* Notes of Significance \*\*\***  
 Fires highlighted in yellow have submitted a final ICS-209

[illegible]

## Evening Brief

Date: Saturday August 5, 2017

---

### Weather Summary

**\*\*\* Critical dry lightning over western Nevada on Sunday then expanding east and north into early next week\*\*\***

Lightning will push northeastward across western and northern Nevada Sunday and move north into Idaho by Monday. This is of particular concern as these are the same areas that saw unusually hot and dry weather last week. Although these storms will be a mix of wet and dry, any drier strikes will be a concern for fire starts, with increased spread by strong outflow winds. A High Risk has been issued for lightning for portions of Nevada Sunday, then spreading into Idaho by Monday. Thunderstorms will be a mix of wet/dry, however spotty precipitation initially after very hot and dry conditions will still bring the potential for new starts and spread with gusty outflow winds.

Moisture will increase from south to north Sunday into early next week, but drier storms may still be possible on Tuesday in the north.

---

### Preparedness Levels

Great Basin	3
National	4

---

### Great Basin Fire Activity (from Irwin): Light Activity

**New Fires and Acres: 10 fires for 20,475.78 acres; 45,155 acres large fire growth; 3 new large fires**

---

### Resources:

- Crews: 12 T1 IHCs in GB: 10 committed, 2 Available.
- GBCC has committed an estimated 79+ Type 3, 4, 6 engines.
- 1-T1 and 10-T2 helicopters are available in GACC.

---

### Great Basin Fire Potential Summary

Near record fire danger indices for the time of year are being observed over the mountains of western Idaho with very high indices elsewhere across Idaho into northern Nevada. Values are much lower across the south and east. As lightning activity increases across the northern half of the region over the weekend into early next week new IA and the potential for new large fires will increase.

We have issued a Great Basin **Fuels and Fire Behavior Advisory for Nevada, Idaho and Utah**, available at the following link:

[https://www.predictiveservices.nifc.gov/fuels\\_fire-danger/GB\\_Fuels\\_and\\_Fire\\_Behavior\\_Advisory.pdf](https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf)
